

Are You NAECA Ready?

NEW (NAECA) WATER HEATER ENERGY STANDARDS

On April 16, 2015, there will be significant updates to water heater energy factor (EF) requirements as the result of updates to the National Appliance Energy Conservation Act (NAECA). These new requirements call for higher Energy Factor (EF) ratings on virtually all residential gas, electric, oil and tankless gas water heaters. The NAECA rulings are important to customers because they reduce energy usage and save money all year long. According to the U.S. Department of Energy website, standards mandatory in 2015 will save approximately 3.3 quads of energy and result in approximately \$63 billion in energy bill savings for products shipped from 2015-2044.
